

*Helsinki Institute for Information Technology HIIT, founded in 1999, is a joint research institute of the University of Helsinki and the Helsinki University of Technology.*

HIIT conducts internationally top-level basic and strategic research in information technology (IT), in close collaboration with the IT industry and applying sciences, and gives researcher training and research-related education.

The aim of HIIT is to raise the contents, visibility and impact of Finnish IT research to the highest international level and thus to strengthen further the interaction between Finnish universities and the IT industry and major international research centres and universities.

HIIT works to benefit the long-term competitiveness of the Finnish IT industry and the progress of the Finnish information society by combining scientific academic research with long-term and risky strategic industrial research and development and with the development of the information society.

HIIT consists of an Advanced Research Unit (ARU) and a Basic Research Unit (BRU), each comprising a number of multidisciplinary research groups. HIIT/ARU is located in Ruoholahti in Helsinki and HIIT/BRU at the computer science departments of the two founding universities.
